

Frequency Information in Speech Perception

Workshop Programme

May 29 - 31, 2017

Venue: Großer Sitzungssaal, Werthmannstr. 8, 79098 Freiburg

Monday, May 29

- 9:30 – 9:45 Opening
- 9:45 – 11:45 Cynthia Connine (Binghamton University, New York)
Lexical and variant frequency in perceptual learning
- 11:45 – 12:00 Coffee break
- 12:00 – 12:45 Sophie Brand (Radboud University, Nijmegen)
The use of variant frequency in the comprehension of reduced speech by natives and foreign language learners
- 12:45 – 14:00 Lunch
- 14:00 – 16:00 Tessa Bent (Indiana University, Bloomington)
Nonnative accents and regional dialects: perceptual development and cognitive representations
- 16:00 – 16:15 Coffee break
- 16:15 – 17:00 Helena Levy (University of Freiburg)
Long-term effects of frequent accent exposure on children's perception of accented speech
- 19:00 Workshop dinner (optional)

Tuesday, May 30

- 9:30 – 11:30 Audrey Bürki (University of Potsdam)
Exposure frequency in language perception and production: Evidence from pronunciation variants and syllables
- 11:30 – 11:45 Coffee break
- 11:45 – 12:30 Sophia Wulfert (University of Freiburg)
Frequency of sublexical units in speech perception
- 12:30 – 13:15 Marten Juskan (University of Freiburg)
Frequency of remembrance in social priming
- 13:15 – 14:30 Lunch
- 14:30 – 15:15 David Lorenz (Univ. of Tartu/Univ. of Freiburg) & David Tizón-Couto (Univ. of Vigo)
The role of frequency (information) in the production and processing of reduced and coalesced forms: the case of the V-to-V_{inf} construction
- 15:15 – 16:00 General discussion
- 18:30 Guided tour of Freiburg (optional)

Wednesday, May 31

- 9:30 Breakfast on the RTG terrace (Belfortstr. 18, 3rd floor)
- afterwards One-on-one sessions with keynote speakers and PhD students
